THE PROBLEM

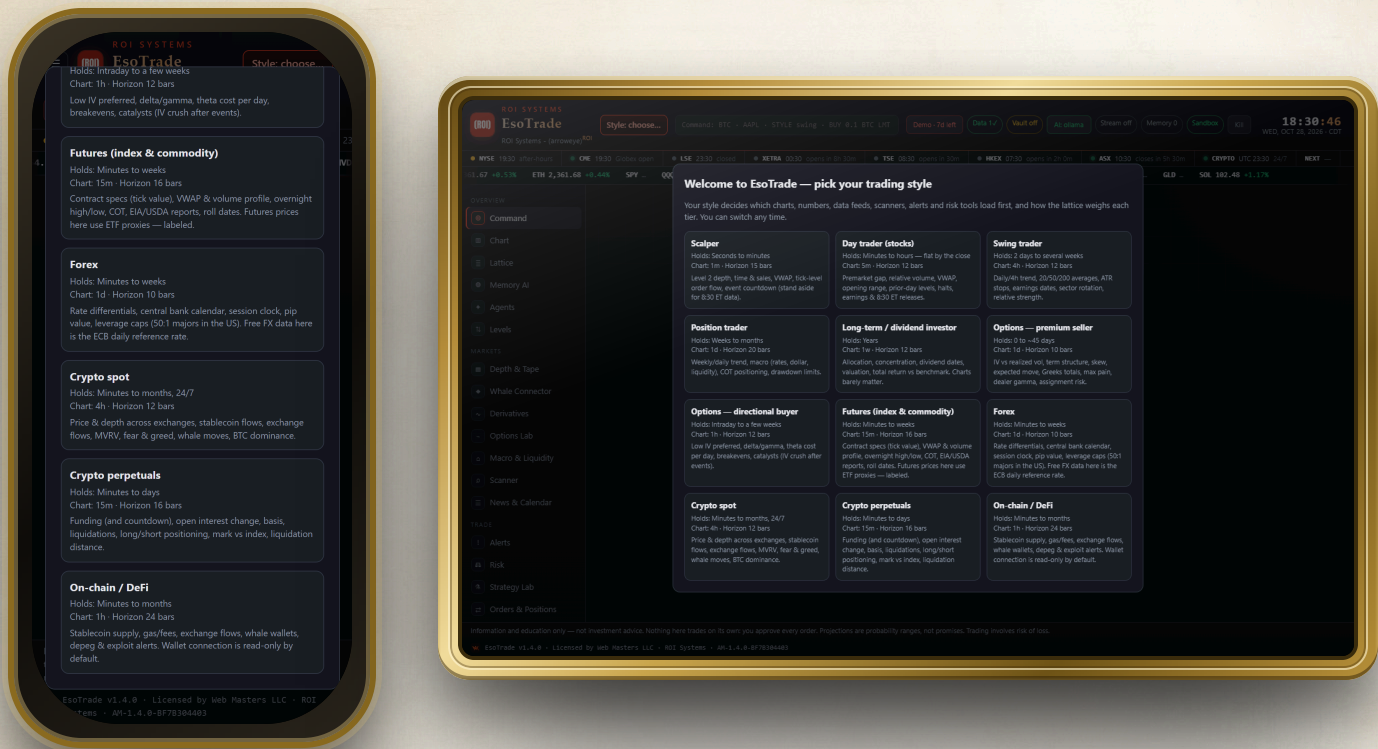

Self-directed traders of stocks, crypto, options and futures (software, not advice)

WHAT IT DOES

A market intelligence terminal for stocks, crypto, options and futures: pick your trading style, and AlphaMind weights a 50-variable lattice, keeps a learning memory on your device, and drafts trade ideas you approve or reject. Paper trading built in.

- ◆ Choose your trading style: 12 styles, each with its own charts, numbers, scanners and risk
- ◆ 50-variable lattice in six tiers, with every contribution to the score shown
- ◆ Projection ranges on the chart, graded against what actually printed
- ◆ Memory AI on your device that only trusts what beats chance on held-out data
- ◆ Options lab: dealer gamma, max pain, skew and the IV term structure
- ◆ Paper trading, journal, risk checks and a kill switch; you approve every live order
- ◆ Connections hub: paste your own keys (Twelve Data, Polygon, FMP, Finnhub, Alpha Vantage, FRED) with one-click tests
- ◆ Interactive Brokers and Alpaca orders, NinjaTrader signal files; crypto wallets (MetaMask, Coinbase Wallet, Phantom and more) read-only

A CLOSER LOOK

PRODUCT NOTICES

Software only. ROI AlphaMind is not a broker-dealer, exchange, custodian or registered investment adviser, and does not provide investment, tax or legal advice or recommendations. Scores, projections and agent trade cards are information and education, not advice. Live orders go only to brokerage accounts you open and connect yourself, using your own API keys, and every order must be reviewed and approved by you; nothing trades on its own and we never hold your funds or keys. Projections are probability ranges, and past, simulated or paper results do not predict future results. Trading stocks, options, futures and crypto-assets involves substantial risk of loss, including loss of more than you deposit on margin or leveraged products. Crypto-assets are volatile and are not protected by SIPC or FDIC. Market data comes from third-party feeds and can be delayed, wrong or unavailable. You are responsible for your trades, taxes and compliance with the rules of your broker, exchange and jurisdiction.
